

SWIRE ENERGY SERVICES

**Servicing the
energy world**

Swire Energy Services offer service and maintenance solutions to the wind industry.

We are specialists in the provision of integrated aviation support services for the international oil & gas, marine and windfarm sectors.

Turbine +

Our deliveries can vary from a single technician to a fully managed and scheduled maintenance program covering all electrical and mechanical work scopes.

Using Swire Energy Services as your trusted service partner provides a focus on safety, delivery, quality and collaboration in the most optimum way.

Turbine +

- Manpower provision
- Electrical Maintenance
- Mechanical Maintenance
- Troubleshooting and repair services
- Retrofit & Upgrades
- End of Warranty campaigns
- Major component exchanges
- Foundation maintenance

Why Choose SES?

Flexible solutions in full compliance with all legal laws, local requirements and safety regulations.

HV +

When working with Swire Energy Services as your electrical partner, you team-up with the most experienced high voltage company in the wind industry.

Safety, experience, and readiness is the key to our success. Our industry leading commissioning and service team is standby 24-7-365 assuring and maximizing your asset performance.

HV +

- HV/MV service
- Electrical upgrades
- Installation
- Commissioning
- Substation services
- Statutory inspection
- Operational management
- Prefabricated cable sets
- Built-up and test of switchgear and HV cabinets

Why Choose SES?

Working with Swire Energy Services, you can rely on the most experienced high voltage partner in the wind industry.

Install +

Swire Energy Services have supported pre-assembly and offshore wind installation projects since 2006, thereby being one of the most experienced partners in the offshore wind industry.

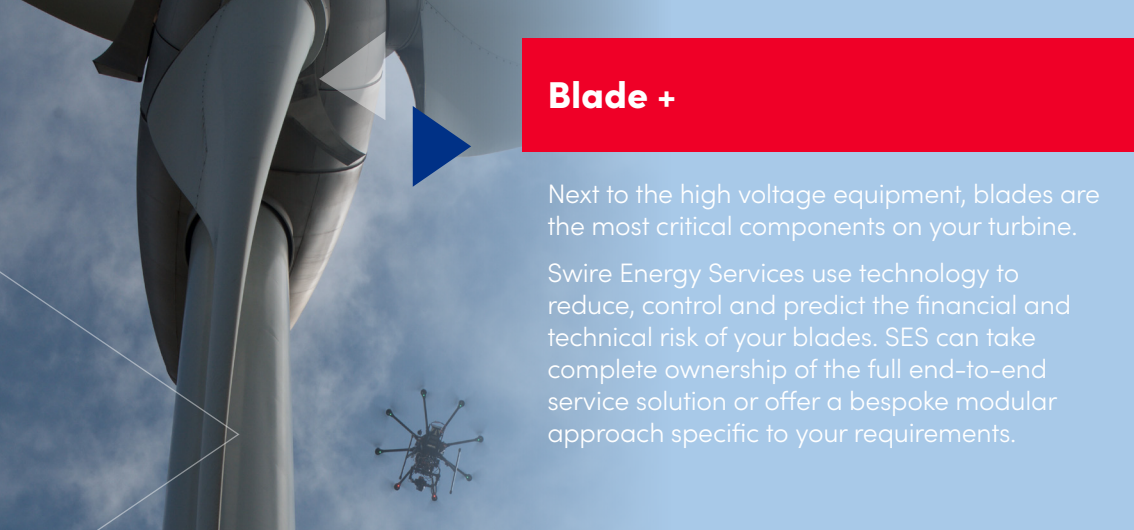

Based on a deep understanding of the processes and logistics involved, Swire Energy Services provides solutions that help increase customers' efficiency while reducing their costs.

Install +

- Manpower provision
- Pre-Assembly
- Installation
- Commissioning
- Internal Grid
- Maintenance and Repair
- Troubleshooting
- Decommissioning

Why Choose SES?

Cooperation with one of the most experienced companies in the wind industry ensures safe project execution.

Blade +

Next to the high voltage equipment, blades are the most critical components on your turbine.

Swire Energy Services use technology to reduce, control and predict the financial and technical risk of your blades. SES can take complete ownership of the full end-to-end service solution or offer a bespoke modular approach specific to your requirements.

Blade +

- Inspection
- Evaluation
- Repair
- Maintenance
- Leading Edge Protection
- Warranty

Why Choose SES?

Flexible bespoke solutions delivered by the easiest company to work with.
