

Aviation & Refuelling Services

SWIRE ENERGY SERVICES

Swire Energy Services are specialists in the provision of integrated and individually tailored aviation support services for the international oil & gas, marine and wind sectors.

SES support the UK Civil Aviation Authority for development of UK and international legislation for the offshore aviation industry.

Refuelling & Monitoring Systems

An established track record in the design, build and installation of refueling systems for the offshore industry.

Many years of operator feedback and customer support have informed our refueling system designs, ensuring they meet the highest safety standards – while facilitating ergonomic operation and maintenance.

Refuelling & Monitoring Systems

- Helifuel Refueling Systems
- Gasoline Refueling Systems
- Other Fueling Systems
- Helideck Monitoring System

Why Choose SES?

- Approved and certified by ABS and DNV-GL.
- Fully compliant with existing and future CAP 437 standards
- Custom-design and manufacture capabilities

System & Helideck Services

Our experienced team provide a comprehensive range of refurbishment, servicing, repair, inspection, and testing services for Helifuel system components and helidecks as well as the supply of components and spares.

System & Helideck Services

- Inspection and Maintenance
- Helideck Friction Testing
- Service and maintenance of fire suppression systems, CCTV, safety equipment and helideck monitoring systems
- Components and Spares supply

Why Choose SES?

- Engineers certified for offshore work
- Reduce downtime with full scope service provider

Equipment Rental

Swire Energy Services operate with a global footprint, throughout our bases we supply our fleet of Fueling Systems, Helideck Monitoring Systems and Aviation Tanks.

Equipment Rental

- Fueling Systems
- Helideck Monitoring Systems
- Aviation Tanks

Why Choose SES?

- Supported worldwide by regional SES specialist engineers
- Approved and certified by ABS and DNV-GL.
- Fully compliant with existing and future CAA CAP 437 standards

JET A-1 Fuel supply & Management

Storage, supply and distribution of a broad range of aviation fuels as well as tank fleet management, fuel testing and additional fuel services.

JET A-1 Fuel supply & Management

- Jet A-1 Fuel supply
- Tank Fleet Management
- Fuel Testing & Certification

Why Choose SES?

- CAA CAP 437 fuel quality control standards
- Compliance with IMDG code, EN12079 and DNV 2.7-1
- Complete documentation package

► Servicing the energy world

Oil & Gas

- DNV 2.7-1 offshore container solutions
- Testing & inspection
- Maintenance & refurbishment
- Lifting services
- Engineering

Wind

- Installation, Commissioning & Decommissioning
- Wind Turbine Maintenance
- Blade Inspection & Repair
- HV Electrical Services.
